Please find below and/or attached an Office communication concerning this application or proceeding.

		Application No.	Applicant(s)				
Office Action Summary		10/792,234	WEINSTEIN ET AL.				
		Examiner	Art Unit				
		Mark Halpern	1731				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status

## **DETAILED ACTION**

1) Applicant's election of invention I, drawn to claim 1-22, in the reply filed on 6/15/2006, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 24-34, are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2) Claims 1-22, are rejected under 35 U.S.C. 103(a) as being unpatentable over Trokhan (5,073,235) in view of Wicks (4,483,745).

Claims 1-4, 7-14, 17-22, Trokhan discloses a papermaking machine that includes a process of chemically treating a papermaking belt 10. The chemical compound continuously applied from roll 21 to the belt is a silicone oil (col. 11, lines 1-5) or an emulsion of water and oil (col. 13, lines 35-48). Listing of chemical compounds that are applied to the belt is provided and disclosed (col. 10, line 47 to col. 14, line 30, col. 27,

Application/Control Number: 10/792,234 Page 3

Art Unit: 1731

line 58 to col. 28, line 29). In addition of roll 21, the chemical application may also occur by spraying from showers 102, 102a, or by gravure printing. Air atomizers are disclosed, which read on high pressure showers (col. 13, lines 17-50). The chemical application to the transfer belt 10 occurs after the pick up of the formed web 18 by the dryer cylinder 28. The belt and the web follow in direction of arrow B and then are transferred off to the Yankee dryer drum 28 (col. 8, line 10 to col. 10, line 26, and Figure 1). Trokhan fails to disclose that the belt 10 is impermeable. Wicks discloses a papermaking system where a transfer belt is arranged between a press section and a drying section and wherein the transfer belt is impervious (Wicks, Figures 1, 3). It would have been obvious, to one skilled in the art at the time when the invention was made to combine the teachings of Trokhan and Wicks, because such a combination would provide for an improved transfer of the web as disclosed by Wicks.

Claims 5, 16: it would have been obvious that the roll 21 include a cleaning system such as a doctor's blade for cleaning the roll and for proper distribution of the chemical onto the roll.

Claim 15: press nips are disclosed by Wicks.

## Conclusion

3) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.

Application/Control Number: 10/792,234

Art Unit: 1731

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
